Aims and Scope:

IMF Economic Review is dedicated to publishing peer-reviewed, high-quality, context-related academic research on open-economy macroeconomics. It emphasizes rigorous analysis with an empirical orientation that is of interest to a broad audience, including academics and policymakers. Studies that borrow from, and interact with, other fields such as finance, international trade, political economy, labor, economic history or development are also welcome.

The views presented in published papers are those of the authors and should not be attributed to, or reported as, reflecting the position of the IMF, its Executive Board, or any other organization mentioned herein.

“To navigate the global crisis, and to take the best policy decisions, will require mobilizing and extending the knowledge we have about open economy macro, from the implications of liquidity traps, to the dangers of large fiscal deficits, to macro-financial interactions, to the contours of a better international monetary and financial system. My hope and my expectation is that the IMF Economic Review will be central to the effort.” - Olivier J. Blanchard, Economic Counsellor and Director, Research Department, IMF.

Online Features:

• Complete online archive available back to 1950.
• Advance online publication - definitive, citable version of papers (complete with DOI) available online ahead of print.
• A Site License to IMF Economic Review will allow access to prior volumes of IMF Staff Papers as a part of the rolling four-year archive. Archive content not included in the license agreement is available to purchase.
