**Knowledge Management Research & Practice** is an official journal of the OR Society.

## Aims and Scope:

Today's knowledge management research and practice is disseminated through a wide range of publications. The community is rapidly evolving. **KMRP** provides a single focus – an outlet for high-quality, peer-reviewed articles on all aspects of managing knowledge, organizational learning, intellectual capital and knowledge economics.

The journal has a particular emphasis on cross disciplinary approaches, and on the mixing of "hard" (e.g. technological) and "soft" (e.g. cultural or motivational) issues. This cross-disciplinary focus enables articles in the journal to address other important tensions in the field of knowledge management, such as those between strategy and operations, people and technology, short-term and long-term needs and the organization and the individual.
