Aims and Scope:

URBAN DESIGN International is the first truly international network for all of those involved in the multi-disciplinary tasks of urban design and management. In providing a direct forum for the exchange of information and a vehicle for the debate which constantly redefines the scope of urban design, the journal places a primary emphasis on bringing together practice and research. It addresses current issues and aims to make a range of materials accessible to all: from in-depth papers and reviews of projects, to book reviews and comments on previous contributions. Some issues are themed by topic or geographic region.

Readership

URBAN DESIGN International is a scholarly publication with a strong practitioner emphasis. It is relevant for all of those involved in architectural and planning education and practice. It is relevant for urban designers, architects, planners, surveyors and landscape architects and all professionals concerned with urban development and design.

Online Features:

- Complete online archive available back to 1996.
